Enginuity Power Systems Announces the Availability of Portable Power Stations

Enginuity Flexible Power Solutions launches a family of three portable power stations for indoor and outdoor usage

Alexandria, VA – September 12, 2024 – Enginuity Power Systems (Enginuity) is pleased to announce that its brand-new portable power stations are now for purchase on Walmart.com. For home emergency preparedness, a sustainable power solution and for flexibility of off-grid living, Enginuity realizes the importance of having powered devices across a multitude of scenarios, both for convenience and emergency.

“Enginuity’s new line of portable power stations delivers cutting-edge reliability and efficiency, perfect for anyone from outdoor enthusiasts to those concerned with emergency preparedness,” says John Morris, Senior Vice President of Commercialization. “Designed to stand out against well-established competitors, our power stations offer the ideal blend of power and portability. We’re making it easy to get your hands on one—simply visit Walmart.com to place an order. With just a few clicks, you can have the power you need, wherever you need it.”

“Having powered devices in today’s society is not simply a matter of convenience, but rather a necessity. The Enginuity Flexible Power Solutions’ products can provide power not only while in remote outdoor regions, but also at-home when there is a weather-related grid failure or other power disruption,” says Enginuity Power Systems’ CEO Jacques Beaudry-Losique, “bringing these versatile and trustworthy products to market is an important step for providing power choices to the consumer.”

The [300W](#), [600W](#) and [1000W](#) batteries, weighing between 6lbs and 13lbs, depending on the model, are easily portable and can conveniently be charged with the addition of solar panels during outdoor exploration or an at-home emergency. Offering multiple charging outlets including AC outlets, DC ports and USB ports, every type of device can have essential power for when it’s needed. Enginuity Flexible Power Solutions will also launch a family of portable solar panels and an EV charging state-of-the-art expandable 3600W portable power station later this year.
